## **CommandSoft launches its fourth generation FibreJet® SAN Management Software**

64-bit compatible cross-platform, shared code-base supporting the latest OS offerings OS X Snow Leopard and Windows 7

**Santa Barbara, California – Wednesday, December 3, 2009:** CommandSoft, Inc., a leading developer for shared storage solutions, today announced their latest version of their popular FibreJet® SAN management representing the fourth generation of the FibreJet product line.

FibreJet® 4.0 now shares a common code base between platforms bringing Mac OS X style user interface to its cross platform Windows offering. This next generation also includes advanced Meta-data management with built in file system repair, powerful data migration, and a totally new command line interface allowing automation of important maintenance and operation functions to free up administrators and editors for more productive use of their time.

### **New to FibreJet 4.0 X-Platform**

Version 4.0 incorporates all features present in FibreJet version 2.x and 3.x plus some major additions:

- Command Line Interface**
- Unified Code for both Mac OS and Windows**
- Support for 64bit kernel in Snow Leopard and Windows 7**
- Elastic Storage Expansion**
- Data Migration Engine\*\***
- SAN Support Tools**
- Built-in Advanced File System checking and repair utilities**
- Built-in Partition Map recovery tool to Resurrect damaged partition maps\*\***
- Built-in Virtualization Support\*\***
- Maturing Meta-data-based Database Engine**
- A growing "Users" and "Profiles" paradigm**
- Increased Customization Options\*\***

The new generation of FibreJet offers users an ever-increasing list of exciting new features. Administrators can now expand existing file systems\* that need more space right within FibreJet. A new Data Migration engine allows SAN administrators block-copy or file-copy capabilities for data duplication, backup, and storage retirement. SAN Support

tools include event log auditing and SAN Health support in the form of built-in diagnostics reporting, file system checking, and advanced repair.

A new tool provides an unprecedented view into the virtualization of SAN structure including the relationships between a file system volume and its underlying physical disk, partition structures and software RAID structure. This tool also includes utilities for archiving the partition maps, useful not only for support purposes, but also recovering from certain catastrophic data-loss scenarios.

FibreJet 4.0 offers many new features in addition to those listed above, including an entirely new GUI unified across platforms and made possible by a unified code base for Mac and Windows, custom meta-data enabling the user to apply user-defined graphics in the GUI, and new ways for users to manage multiple workflow environments with User Profiles, allowing SAN working environment configurations to follow Users from one workstation to another on the SAN.

FibreJet 4.0 for Mac OS X is available for immediate download for a charge of just \$499.00 for all FibreJet customers with active CommandSoft maintenance/support agreements, request your upgrade code at:

<http://www.commandsoft.com/support.jsp>

Users of FibreJet SANs not covered by active CommandSoft support agreements can order FibreJet 4.0 upgrades for \$699/seat from all authorized FibreJet resellers or CommandSoft directly at: (805) 730-7772.

### **About CommandSoft – [www.commandsoft.com](http://www.commandsoft.com)**

CommandSoft, Inc. is the developer of FibreJet, a next-generation, shared-storage solution for Storage Area Networks (SANs). FibreJet enables file systems to be dynamically shared in a multiple-reader / single writer environment. CommandSoft was founded by the original developers of FibreNet™, StudioBOSS™, FC Net Director RAID™, SAN Manager™ and other storage software systems. They were among the first Fibre Channel innovators through their development of HBA drivers for Windows™, Solaris™, Macintosh™ OS and IRIX Fibre Channel chip sets from QLogic™, Emulex™, and Agilent™. For more information on the company, its products and its mission, visit the CommandSoft website at: [www.commandsoft.com](http://www.commandsoft.com) or call 800-447-0144.

\*Support for expansion of file systems requires certain criteria to be met in relation to the configuration of partitions on the storage.

\*\*Some new FibreJet 4.0 SAN Management features are currently available only in Mac OS X environments.

FibreJet® is a trademark of CommandSoft, Inc. Windows is a trademark of Microsoft Corporation. Transoft, FibreNet, StudioBOSS, FC Net Director, SCSI Director and SAN Manager are registered trademarks of Transoft Networks, a Hewlett Packard Company. All other trademarks are trademarks of their respective companies.
